

- 1 Plan** your design with a dry erase marker, **etch** with either included safety pin OR a push pin, and **wipe** clean after.

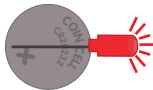

- 2 Peel paper backing** from the acrylic badge blank.

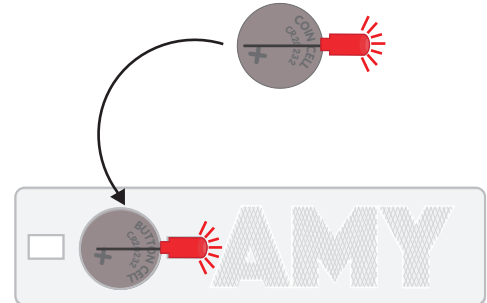

- 3 Connect LED & Battery** by inserting the battery between the two LED legs.

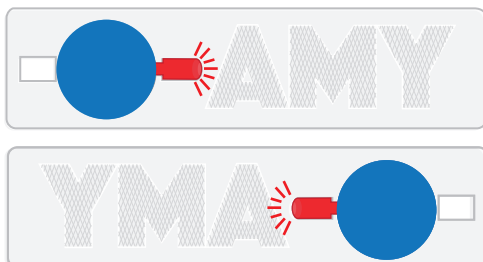

Short Negative (-) leg touches negative/long
Positive (+) Leg touches positive.

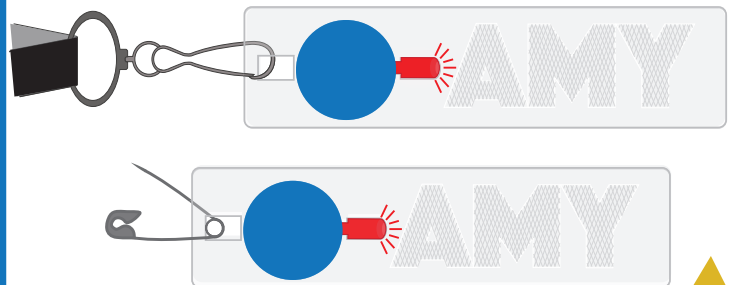

- 4 Once confirmed to be working, insert** the battery/LED combination into the slot on the name badge blank.

- 5 Place stickers atop each side** to ensure that each LED leg is held in contact with the battery.

- 6 Attach** finished badge to a lanyard or your clothing with the safety pin.

Done!
